

Rain Bird HE-VAN/P30 Combo

Taking high efficiency to a whole new level

The Rain Bird HE-VAN nozzle and P30 Pressure Regulating Spray Heads give you unmatched performance and flexibility. Here are three reasons why you should try this high efficiency combo.

- The HE-VAN – available in 8', 10', 12', and 15' radii ranges – is adjustable from 0 to 360 degrees and is the only high efficiency variable arc spray nozzle on the market. This limits the amount of nozzle you need to stock and reduces confusion in designs and on the job site.
- The P30 Pressure Regulating Spray Heads are available in the Standard 1800 or the RD1800. The RD1800 is the only reclaimed/dirty water spray head on the market giving you unmatched performance and quality
- With its large water droplets, high distribution uniformity, and low scheduling coefficient, you can count on HE-VAN to shorten your watering times and reduce wasted water from unnecessary overwatering.

Model	Distribution Uniformity (LQ)	Scheduling Coefficient (SC)
HE-VAN-08	73%	1.4
HE-VAN-10	73%	1.4
HE-VAN-12	75%	1.4
HE-VAN-15	78%	1.2

Other Additional Benefits with the Rain Bird Combo

- Pressure regulation ensures optimal nozzle performance
- The HE-VAN's high DU and low SC means a reduction in run time and less water wasted
- With the HE-VAN's 0 to 360 degree adjustability, less SKU's have to be inventoried
- Patented Triple Blade wiper seal on RD1800 eliminates flow-by
- Flow Shield Technology on RD1800 spray head reduces water loss by 90% if a nozzle is damaged or removed.
- RD1800 is built to withstand reclaimed and dirty water
