

Maxi-Paw™ 2045A Rotor

Technical Specifications

The Maxi-Paw's powerful throw permits maximum spacing, offers superior close-in watering, and delivers uniform water distribution. Low pressure loss and an efficient, straight-through flow design conserve energy and are ideal for dirty water applications. The optional Seal-A-Matic™ (SAM) check valve prevents runoff, puddling, and erosion caused by low head drainage. And most important, it's rugged and dependable, popping up on schedule again and again because of the multi-function wiper seal. The Maxi-Paw Rotor—a tradition of excellence.

2045A MAXI-PAW NOZZLES

SPECIFICATIONS:**2045A Maxi-Paw
Full- or Part-Circle
Pop-Up Rotor**

The full- or part-circle pop-up rotor sprinkler shall be a single nozzle impact drive type, capable of covering a _____ foot/meter radius at _____ pounds per square inch (PSI) or (Bars) with a discharge rate of _____ gallons per minute (gpm) or (l/s; m³/h). The part-circle sprinkler shall have an infinitely adjustable arc of coverage from 20° to 340°. Full-circle (360°) shall be accomplished by disengaging the trip mechanism of the impact drive.

The sprinkler case and internal assembly, except for the arm spring, bearing spring, wiper seal, and bearing washers, shall be constructed of durable engineered plastics. The rotation of the sprinkler shall be accomplished by a double-weighted, horizontal-oscillating Precision Jet (PJ™) arm, actuated by the outlet water stream. The double-weighted arm shall provide for a slower rotation speed and increased distance of throw.

The sprinkler shall have an adjustable diffuser pin for distance and distribution control and shall be capable of full- or part-circle operation. The sprinkler nozzle outlet trajectory shall be 23° for the standard nozzles and 11° for the low-angle nozzles.

The sprinkler shall have a strong, stainless steel retract spring for positive pop-down. Pop-up height shall be 3 in (7.6 cm).

The sprinkler shall have a multi-function, pressure-activated wiper seal for low pressure operation and for cleaning debris from the riser as it retracts into the case.

The sprinkler shall have a ½" (FNPT) side and a combination ½" or ¾" (FNPT) bottom inlet for installation flexibility and a bottom inlet screen to protect nozzle from clogging. The case shall have a sturdy, reinforced rib design with flange.

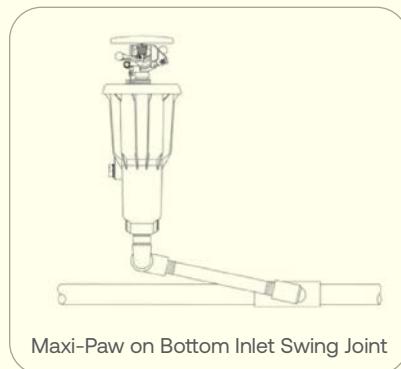

The sprinkler shall accept seven interchangeable, color-coded nozzles.

The sprinkler shall be as manufactured by Rain Bird Corporation.

**2045A-SAM
Full- or Part-Circle
Maxi-Paw Pop-Up Rotor
with Seal-A-Matic****Optional Feature Specifications**

When so indicated on the design, the full- or part-circle pop-up rotor sprinkler shall have all the specifications of the standard version with a Seal-A-Matic (SAM) check valve to prevent low head drainage for elevation differences up to 10 ft (3.1 m).

The sprinkler shall be as manufactured by Rain Bird Corporation.
