

## Changing the Way We Consume Water

Introducing the Flume Smart Home Water Monitor and Leak Detector—the device revolutionizing how we see, use and conserve water. Flume attaches directly to the homeowner's water meter and is able to detect leaks, show detailed water use, conserve water and save them money right out of the box.

By combining Flume's easy-to-install smart home water monitoring with Rain Bird's market-leading irrigation controllers, property owners and water agencies can track the water used for irrigation, appliances and more—down to the drop.

### Smart Water Use Monitoring

The Flume device provides high-definition, down-to-the-minute water use to help homeowners manage their consumption.

### 24/7 Leak Detection

Flume immediately alerts homeowners of abnormal (or accidental) water usage through the Flume app. In fact, 70% of Flume users find leaks, saving money and countless gallons of water.

### Partnership

Flume's partnership with Rain Bird will help homeowners maximize outdoor water savings. Homeowners will know exactly how much water is being used by their irrigation system, by zone, day, week and year.

# Flume Smart Home Water Monitor

## Indoor Versus Outdoor Water Use

- ▶ Flume lets homeowners see indoor consumption and view usage history
- ▶ Flume is also able to detect leaks within the irrigation system
- ▶ Rain Bird and Flume's joint solution will allow homeowners to understand exactly how much water is being used for irrigation--by zone, day, week and year

## See Water Use by Fixture

- ▶ Flume offers homeowners a brand new look at their water by showing them exactly how much water everything in the home uses
- ▶ See what percentage of your water use comes from toilets, showers, dishwashers, water softeners, sprinkler systems, and more

## Water Use Budgets: Save with Flume

- ▶ Homeowners can create water use budgets that use smart alerts to notify them of potential water leaks and waste
- ▶ Flume will automatically recommend a budget based on current water use
- ▶ Flume has saved homeowners 10-20% per month on their water bills

**Flume detects leaks within the irrigation system and immediately reports any abnormal usage in the app.**

**Flume Has It All**

- ✓ Leak notifications
- ✓ Real-time water usage data
- ✓ Customizable water use budgets
- ✓ Detailed indoor and outdoor water usage by fixture/zone
