

"Rain Bird helped modernize the irrigation system at Conway Farms Golf Club with a new 2-wire IC system in conjunction with CirrusPRO™. The functionality, adaptability, and simplicity of CirrusPRO is one of the truly meaningful advances in technology in my 30-year career in the golf industry. Having real-time information at our fingertips is critical. All management staff can see not only what is being run on their tablets or phones but also what is next in the queue, with timing down to the second one when sprinklers will turn off and what will come on next. It allows us to customize as much as we want, ultimately giving us the flexibility to deliver water in the most efficient manner possible for any type of application we are looking for on a given day. CirrusPRO is no doubt a game-changer!"

Connor Healy, Conway Farms Golf Club, Lake Forest, IL
