

 **GRASS CLIPPINGS**

"When we inherited Rolling Hills Course in July 2023, the irrigation design, among other key parts of the property, was questionable at best. With the support of our local reps, we have been able to modify the golf course irrigation to fit our needs, optimize water usage, and bring life back into the course. When we built the new 9th hole and our 15,000 square foot putting green, we used a combination of Rain Bird's irrigation heads to create something special for the golfing community. With our first season underway and more construction ahead, we will continue to deliver a world-class experience for our guests during the day, or under the lights at night."

Scotty Hebert, Director of Agronomy, Grass Clippings, Tempe, AZ
