

MORE LEGISLATION AND RESTRICTIONS ARE COMING...

# Are You Ready to Defeat the Drought?

Explore Rain Bird product pairings designed for maximum water efficiency.

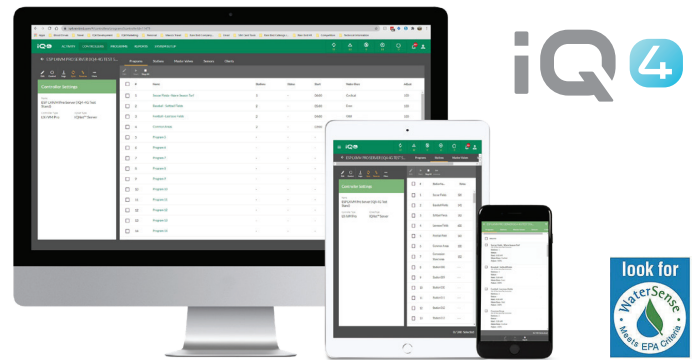

MONITOR > REGULATE > CONSERVE

## IQ™4 Central Control Software + ESP-LXME2 & ESP-LXIVM Controllers

Monitor irrigation schedules and spot issues from one mile...or one thousand miles away.

- Remote access from any web-enabled device
- State-of-the-art monitoring, programming, and control
- Automatic weather-based adjustments
- Catastrophe avoidance for ultimate water conservation
- FloWatch™, FloManager™, and Cycle+Soak™ options
- WaterSense® certified product pairing

## PRS Spray Bodies + High-Efficiency Nozzles

Pair high-efficiency nozzles with spray bodies equipped with Rain Bird's Pressure Regulating Stem (PRS) to save up a gallon of water per minute, per head.

- Even pressure and coverage
- Consistent flow rates
- Reduced misting and fogging

Learn how you can save money and resources with the Intelligent Use of Water™

# IQ Central Control Saves Arizona Property Nearly 7,000 Gallons of Water in Just One Event

## Problem:

AAA Landscape provides irrigation installation and maintenance services for three communities in Phoenix, Arizona. The team was experiencing challenges that are typical when managing large properties: problems in the irrigation system that are not visible—cracked mainlines or seeping valves—waste water and are difficult to detect.

IQ Central Control

## Solution:

To better manage the HOAs' systems, AAA Landscape turned to ESP-LXME Series Controllers equipped with Smart Flow Modules and IQ Central Control. IQ uses information from the Flow Smart Module to detect excess flow; if a problem is discovered, the IQ immediately shuts off the system or individual zone affected. Additionally, the IQ system allows AAA Landscape to remotely manage multiple sites with simple program reports, alarm reports, and water usage reports for convenient monitoring and budgeting.

“ We chose the Rain Bird IQ system for trust in the brand, the user-friendly software interface, and the flexibility to install only what our clients need. IQ gives us the ability to program our controllers daily using live weather updates from our weather station thereby only delivering the water that is needed for any given day.
