Introduction

Rain Bird is updating our 1½ -inch control zone kits with a new fixed Pressure Regulating System (PRS) in lieu of the inline regulator, which is no longer available. The fixed PRS maintains the control zone outlet pressure at 40 PSI by regulating the position of the valve diaphragm. Rain Bird's PRS technology has demonstrated superior performance and includes fewer moving parts, improving reliability. This regulation method is similar to the PRS-Dial but is not adjustable.

Impact

The updated control zone kits will keep the existing model numbers, so new orders for XCZ-150-LCS and XCZ-150-LCDR will be fulfilled with the updated kits. If ordering by Product ID, please use X10343 and X10344 respectively.

Existing backorders tied to Product IDs X10340 and X10341 have been updated to the new IDs and are being fulfilled. Existing backorders for the 1-inch 1.5-inch inline regulators (X15210, X15211, and X15215) will be cancelled. Please contact your Rain Bird Customer Service Representative for assistance.
