LF™ Series Sprinkler Quick Reference

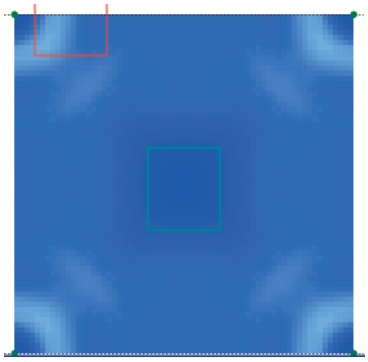
Banana Tree Irrigation, 10 x 10 Meters

The LF™ Series sprinkler by Rain Bird supplies the precise irrigation control needed for healthy banana trees. The robust design of the LF™ Series provides maintenance free operation under all water conditions and is especially suited for applications where fertilizers are applied through the irrigation system.

The rugged LF™ Series sprinkler features interchangeable, color coded, nozzles and deflectors. Rain Bird's innovative configuration software, Uniformity Pro™, identifies the optimal nozzle and deflector combination to fit your specific spacing and application requirements. Multiple deflector angles offer several choices that provide optimum stream breakup and height to protect the psydostem and keep water below the foliage.

The high uniformity of the LF™ Series sprinkler allows you to save on the amount of water and energy required for the best fruit production.

SPACE PRO Densogram



DU = 85%, CU = 91%
5%SC = 1.2, AR = 2.8mm/hr
