

# Trust Rain Bird for benefits you won't find in any other valve box.

Protect the irrigation systems you specify with the most secure, most sustainable and most stable valve boxes in the industry.

## Reduced liability.

**Hole-free lids keep out bees**, wasps, snakes and other critters, reducing the likelihood of stings and bites, while minimizing property owner and public agency liability. With fewer calls to the exterminator, your customers will also save money.

## Earn LEED points.

Promote sustainability and achieve LEED certification. Rugged Rain Bird valve boxes and lids are **made from 100% recycled materials**.

## No bricks required.

Competitive valve boxes feature narrow edges that allow the box to settle deeper into the ground over time. As a result, bricks are specified to hold the box in place. Rain Bird valve boxes feature **wide flanges that eliminate the cost and labor associated with bricks**.

## ANATOMY OF A BETTER BOX

**RECYCLED MATERIALS:** *Black body and black lids made of 100% recycled materials*

**MULTIPLE SIZES AND SHAPES** *make it easy to choose the right boxes for the job*

- 1 BEVELED LID EDGES** *prevent damage from lawn equipment*
- 2 BOLT HOLE KNOCK-OUT** *keeps hazardous insect pests out when bolt is not used*
- 3 SHOVEL ACCESS SLOT** *for easy removal of lid*
- 4 INTERLOCKING FEATURE** *locks two boxes together when fitted bottom-to-bottom for deep installations*
- 5 CORRUGATED SIDES** *maintain structural integrity under heavy load*
- 6 KNOCK-OUT RETAINERS** *hold removed knock-outs in place during backfill*
- 7 KNOCK-OUTS** *built into the sides*
- 8 WIDE FLANGE** *stabilizes box eliminating need for block or brick and provides enhanced side load strength*
