HV/HVF Series Irrigation Valve

Reliable Residential Irrigation Valve

Rain Bird Valves have a decades long reputation in the industry as the most reliable residential valves on the market. The new HV valve follows in that grand tradition. They are tested to tough standards to ensure high performance for many years to come making it a great residential valve choice.

HV/HVF Series Irrigation Valve

Low Price

- The HV price is 20% lower than the competitor's price in most locations.
- Rain Bird's 5 decades of experience manufacturing valves and today's modern materials and methods have produced a great valve at a low price.

Easy Maintenance

- 4 captive, multi-drive screws allow bonnet removal in half the time of other valves.
- Its captured diaphragm and diaphragm spring also mean no more searching for the parts that fell out of the valve during disassembly.

Compact Design

- The HV valve's compact design may allow you to reduce the number of valve boxes on a job. This lowers your cost and makes a more attractive landscape.
