

# Maxicom 4.4 is here.

Advanced Irrigation Control for Over  
30 Years and Long Into the Future

## What's New in 4.4?

- Windows 8 compatibility
- Seek & Eliminate Low Flow (SELF) – Automatically diagnose a low flow problem
- Station Lockout – Quarantine zones that have had high/low flow alarms until the user takes action
- Station Priorities for Flow Manager – allows the user to alter the sequence of irrigation zones by assigning priorities when flow manager is being used
- Queued irrigation max run time limit increased from 99 minutes to 999 minutes
- Adjustable rain can settings
- Seek & Eliminate Excessive Flow (SEEF) improvement to account for manual adjustments
- Database trim setting is no longer fixed and is user-selectable so users can decide how far back the records go
- Phone number/address field works with URL's and longer IP Addresses
- Field Device Configuration Report now includes satellite names and sensor names

## System Features

- Windows XP, Windows 7 (32-Bit and 64-Bit) Home Premium, Professional and Ultimate, and Windows 8 (32-Bit and 64-Bit)
- 200+ Sites per System
- 5,600+ Satellites per System
- Up to 28 Satellites per CCU
- Up to 672 Satellite Stations per CCU
- Up to 112 Simultaneous Stations per CCU
- Up to 99 Programs per CCU
- Up to 1 Flow Sensor per Available CCU Channel in Two-Wire Systems
- Up to 2 Flow Sensors per Satellite in Link Systems
- Up to 56 Weather Sensor Inputs per CCU
- Map View – BMP, PDF, JPG
- FREEDOM™ Remote Control System
- Multiple Communication Options
- System Purchase Includes Global Support Plan (GSP)

## Proven Success in the Field

Maxicom is the most advanced central control system on the planet. With unmatched flexibility, hospitals, universities, theme parks, cities, and sports fields all over the world have benefited from the ever growing list of features.

## Unmatched Training and Support

There's a difference between simply having a central control system and getting the most from your central control system. That's why Rain Bird offers extensive training and support to make sure you get the results you deserve. Tap into the expertise of our Water Management Team, choose from over 40 Rain Bird Academy training courses, or take advantage of our Global Service Plan if things ever go wrong. Either way, Rain Bird will be there to help you get the biggest possible return from your investment.
