

WHAT IF IT RAINS?

WHAT IF IT DOESN'T?

WHAT IF I MAKE A MISTAKE?

WHAT IF I'M OUT OF TOWN?

WHAT IF IT DIDN'T MATTER?

THE 22-ZONE RAIN BIRD® ESP-SMTe SMART CONTROL SYSTEM: THE END OF WHAT IF

Gone are the hassles and what if's of traditional time-based controllers. Based on the leading weather-based technology used by golf courses, the ESP-SMTe smart control system automatically waters your landscape as recommended by the Irrigation Association.

- During rain events, the ESP-SMTe not only delays irrigation, it measures rainfall, including the amount and intensity. And, because its calculations are based on both accumulation and force, the ESP-SMTe can more accurately adjust your watering schedule to prevent under- or over-watering.
- Soil type, the slope of your lawn, plant type and sun exposure are factored into your watering schedule. These details are calculated for each zone of your system to help you maintain a lush, healthy lawn and landscape.
- You enjoy a beautiful landscape, while saving valuable time. You also don't have to worry about seasonal adjustments and severe swings in temperature or precipitation. Because your controller recalculates its watering schedule automatically.
