

# Operation Indicator Kit

## Operation Indicator Kit for Drip Irrigation

Rain Bird Drip System Operation Indicator Kit provides a quick visual assurance that your drip irrigation system is running, which is especially valuable with a subsurface installation. When your drip system reaches 20 PSI (1,4 bar), the pop-up indicator rises 6 in. (15 cm) to provide a clear visual indication that the zone is on and water is flowing. When the system is off, the pop-up indicator retracts to become hidden by lowering safely and securely back into the operational indicator body.

### Visual Indication

When the drip irrigation zone is running, a pop-up indicator rises to expose a bright colored cap.

### Potable or Non-Potable Indicator Options

Operational Indicator Kit includes two different indication caps for potable and non-potable water source.

### Durability

When not in use, the stem retracts flush into the body to hide and protect the indicator.

# Operational Indicator

SYSTEM IS ON

SYSTEM IS OFF

## Indicates when a Drip Irrigation Zone is Running

- Stem indicator pops up as a visual notification that water in the drip irrigation zone is running.
- Stem rises 6" (15 cm) with a colored indicator cap for clear visibility and notification.
- When not in use, the stem retracts flush into the body to hide and protect the indicator.

POTABLE  
YELLOW CAP

NON-POTABLE  
PURPLE CAP

## Potable and Non-potable Indicator Options

- A yellow cap indicates that the water source in the drip irrigation zone is potable.
- A purple cap indicates that the water source in the drip irrigation zone is non-potable.
- Operating Pressure: 20 to 50 PSI (1,4 to 3,5 bar)

DURABLE TUBING WITH PRE-INSTALLED CONNECTION FITTING

## Durable Construction

- Constructed with UV resistant, high impact plastic.
- Includes 16" of durable 1/4" distribution tubing.
- Self piercing connection fitting pre-installed.

### Model # OPERIND

#### Includes:

- 16" of durable 1/4" distribution tubing with self-piercing connection fitting pre-assembled.
- Pre-installed yellow cap indicates potable water source is used.
- Optional purple cap for indicating non-potable water source is also included.
