

RAIN  ***BIRD***®

XF Insertion Tool

Model:
FITINS-TOOL

Fitting Attachment With the XF Insertion Tool

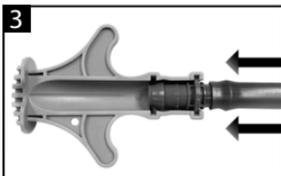

The XF Insertion Tool reduces the effort required to insert the fittings into the tube by 50%.

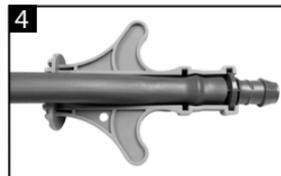

Lock fitting securely into place.

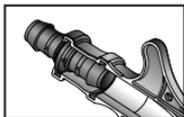

Flare the end of the tube using either one of the tool's handles.

Once the end of the dripline has been flared, push dripline onto fitting.

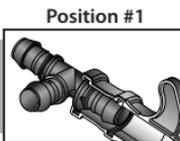

To insert dripline on the other end of a fitting, turn the tool around and lock fitting with dripline into place. Then, repeat step 3.

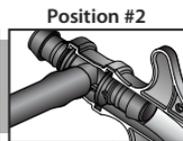

XF Coupling

XF Elbow

Position #1

Position #2

XF Tee

Use position #2 when inserting dripline onto the barb that protrudes from the center of the XF Tee fitting.
