

The Facts About Water

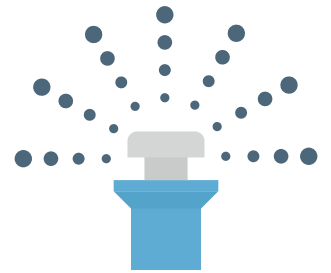

Less than
1%
of the world's water is
potable drinking water.

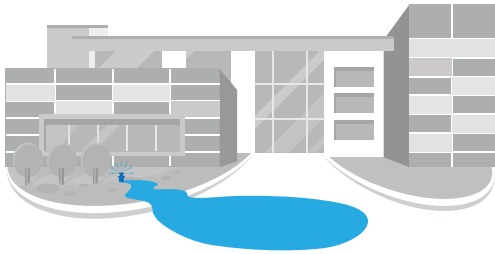

Water is the fastest rising
utility cost, with a
25%
increase since 2010.

More than
70%
of commercial water
use is outdoors.

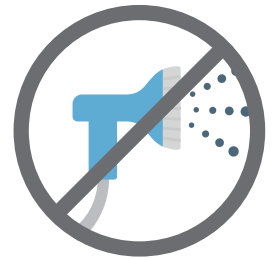

On average, end-users
overwater by
50%

Resulting in costly
runoff, expensive
damage to landscape
and hardscapes, and
often times the total
replacement of turf.

Many municipalities are instituting
**MANDATORY
RESTRICTIONS,**
expensive fines, and regulated
windows for when you may water.

	PERMITTED	TIMES
LEVEL 1	<ul style="list-style-type: none"> Water efficient sprinklers Hand-held trigger/twist nozzle hoses Irrigation systems Watering cans/buckets 	Before 10am and after 4pm on alternate days only.
LEVEL 2	<ul style="list-style-type: none"> Hand-held trigger/twist nozzle hoses Irrigation systems (gardens only) Watering cans/buckets 	Before 10am and after 4pm on alternate days only.
LEVEL 3	<ul style="list-style-type: none"> Watering cans/buckets 	Before 10am and after 4pm on alternate days only.
LEVEL 4	NO WATERING PERMITTED	No watering permitted at any time.

Alternate days: Odd & unnumbered properties - Wednesday, Friday & Sunday. **Even numbered properties** - Tuesday, Thursday & Saturday. No watering on Monday.

Rain Bird Water Management

The Solution for an Efficient and Responsible Site

Reduce Operating Expenses

- Creates Water Budgets.
- Provides reporting to keep you on track and on budget.
- Provides multiple communication options to reduce or eliminate recurring expenses.
- Provides 30-70% savings over traditional irrigation.
- Keeps you in compliance when water restrictions occur so you don't get fined.

Minimize Liability Exposure

- Shuts down all systems when temperatures approach freezing to prevent icy side walks.
- Shuts down systems during rain events.
- Manages watering to protect against slimy sidewalks or broken hardscapes.
- Protects your reputation as a steward of the environment.

Improve Efficiency and Landscape Quality

- Standardizes your irrigation portfolio.
- Incorporates internet or on-site weather to forecast exact plant watering needs.
- Isolates and alarms you of any incidents or line breaks that occur during operation.
- Provides accountability and security for changes to your system.

Total Turnkey Solutions

- It's not just a controller. Rain Bird manufactures a full suite of high efficiency landscape products customizable to your site.
- Our team can assist with and introduce you to designers, architects, contractors and water managers.
- Backwards compatible systems since we introduced water management to the industry over 30 years ago. We have never left a customer behind even as technology has changed.
- Finance options are available to meet your cash flow needs with attractive rates and terms.

Over Eight Decades of Success.

With more than 80 years of experience installing innovative irrigation systems, Rain Bird brings a level of expertise to your project that our competitors can't match.
