

Rain Bird® 1800® Series Sprays

Cycle Surge Test

1800® SERIES

SPRAYANALYSIS

ANYONE CAN SAY THEIR PRODUCT PERFORMS. WE WANTED PROOF.

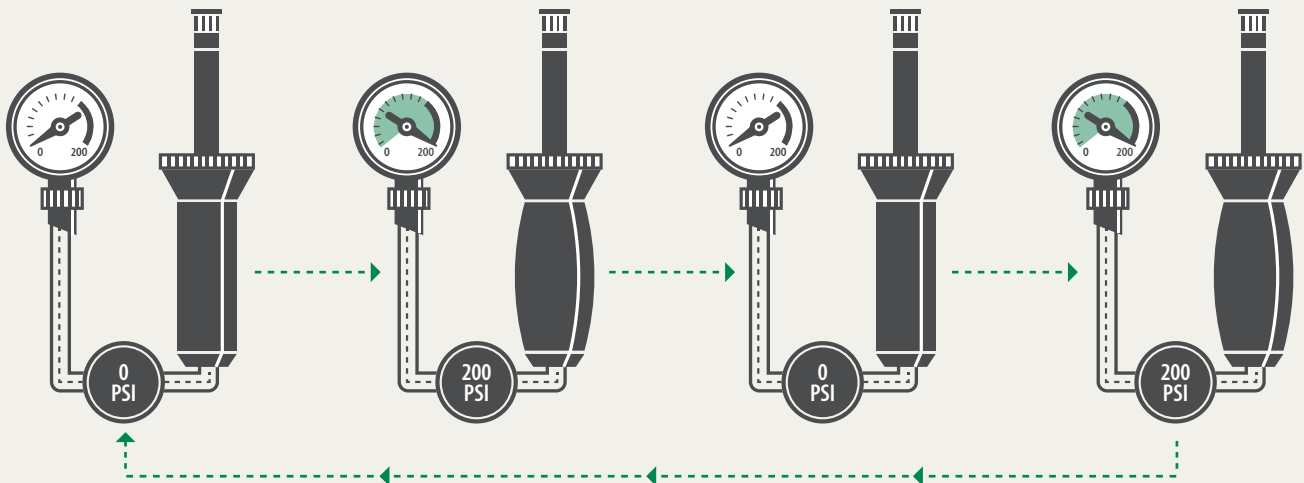

So we put our 1800® Series Sprays through a series of comparison tests with competitive products. We call it "Sprayanalysis." It's your assurance that when you install Rain Bird sprays, you can count on them to deliver as promised, day in and day out.

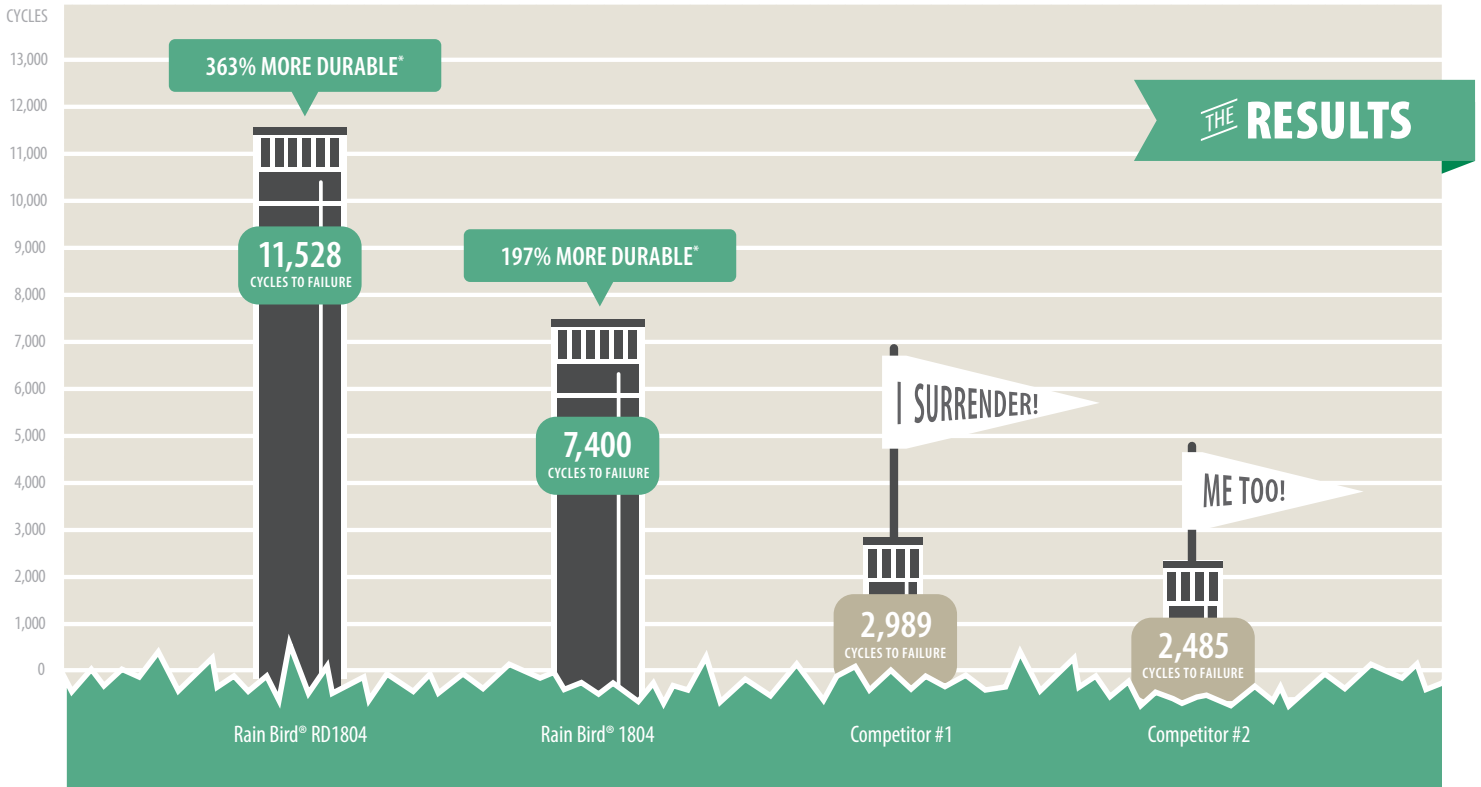

Cycle Surge isn't the only test where Rain Bird triumphs. See more tests at www.rainbird.com/Sprayanalysis.

HOW THE CYCLE SURGE TEST WORKS:

To demonstrate product durability, we subjected the Rain Bird® 1804 and RD1804, along with two competitive sprays, to repeated pressure spikes of 200 psi. These spikes simulated the fluctuating pressures found on many residential and commercial jobsites. When the dust settled, Rain Bird sprays were the last standing. *Turn this page over to see how Rain Bird outperformed the competition.*

WE RAMPED UP THE PRESSURE OVER AND OVER UNTIL THEY WAVED A WHITE FLAG

* Percentage of durability is based on the performance of competitor #2.

Under repeated pressure surges, the competitive sprays cried uncle after 3,000 cycles or less. But the Rain Bird sprays kept going. The 1804 lasted 7,400 cycles and the RD1804 lasted more than 11,500 cycles. If you translate this into years, Rain Bird product will last at least 3 times the average life span of our nearest competitor! While competitive sprays cracked, literally, the Rain Bird sprays were left intact.

363% MORE RELIABILITY MEANS **363% FEWER HEADACHES FOR YOU**

What's in it for you? Well, pressure surges are common at many sites, causing serious headaches for contractors and users. But in high-pressure situations, Rain Bird sprays have proven they can take the heat—and that takes the pressure off you.

THE WORLD'S HARDEST-WORKING SPRAYS

Long after the competition calls it quits, Rain Bird® 1800 Series and RD1800™ Series Sprays are on the job performing. Rain Bird's commitment to unbeatable quality translates to more confidence and fewer hassles for you and your customers.

Cycle Surge isn't the only test where Rain Bird triumphs. See more tests at www.rainbird.com/Sprayanalysis.
