

► **Quick to Program**

Online training videos teach you how to program your controller in minutes!

► **LNK WiFi Ready**

Combined with Rain Bird's LNK WiFi Module (sold separately), you can receive internet-based weather data that adjusts irrigation schedules on a daily basis for up to 30% water savings.

► **Built to Last**

With more than 50 years of controller design experience, Rain Bird's legacy of quality has been integrated into the ESP-RZxe.

## ESP-RZxe Controller

*Eliminate the guesswork from your irrigation controller*

Say goodbye to common programming issues. The ESP-RZxe is modeled after the simplicity of your DVR. Simply pick a zone, set the run time, start times and watering days, all from the same screen! With zone-based scheduling, the ESP-RZxe allows your irrigation system to be fine-tuned to the individual needs of each zone, without the hassle of having to deal with multiple "programs".

When the ESP-RZxe is used along with LNK WIFI module, you can access, control and monitor your irrigation system from anywhere in the world. Local weather data can be used to adjust watering schedules automatically on a daily basis. This results in up to 30% water savings.

# ESP-RZXe Controller

## Quick to Program

- Contractor Rapid Programming makes the ESP-RZXe program like a traditional controller at installation.
- Start times, watering days and run time by zone, all on one screen!

## Easy to Use

- Eliminates common homeowner programming errors, like adding a start time for every zone or adding a zone to the wrong program.
- For the ultimate flexibility, each zone can be scheduled as its own program.
- Powerful features such as At-A-Glance programming, six start times per zone and more!

## WiFi Compatible

- Easy access, monitor and operate your system from anywhere.
- Automatically and seamlessly enjoy the water saving benefits of daily seasonal adjustment.

## LNK WiFi Module\*

**A revolutionary NEW product from Rain Bird that enables instant WiFi connectivity!**

\* Sold separately

Start times are automatically stacked so that only one zone irrigates at a time.

Zone-specific schedules are easy to understand and modify.

Indoor Model

Indoor/Outdoor models available in 4, 6 and 8 station configurations.

Outdoor Model

## Advanced Features

- Contractor Default™. Allows you to simply save and restore your custom schedule.
- Rain Sensor bypass by zone.
- Also compatible with Rain Bird's LIMR remote.
