

## Weather Stations

Rain Bird offers two Weather Station options to help meet your course's unique irrigation management needs. Both WS-PRO2 and the WS-PRO LT provide evapotranspiration (ET) management and reporting capabilities; while only the WS-PRO2 offers optional intelligent alarm and irrigation control responses through Rain Bird's powerful Smart Weather™ software.

### FEATURES AND BENEFITS

**Superior ET Model.** Rain Bird's Central Control Systems use weather sensor input to determine ET rates based upon a field-proven proprietary equation for ET.

**Automatic ET Download/Selective Usage.** Automatically download weather data daily and calculate ET to determine irrigation times for the entire system or by specific areas, holes or stations.

**ET Override.** Allows you to easily set certain programs to ignore ET values when determining run times.

**Rain Bucket.** Allows rainfall from one day to be carried over to the following day(s) for more accurate ET calculations.

**Multiple Station Capacity.** Connect up to five (5) weather stations to one central control system for more precise ET values based upon different weather conditions and micro climates around the golf course.

**Max Rainfall.** User-defined maximum rainfall can be set to limit the amount of acceptable rainfall for specific soil types or other areas that are subject to high run-off.

**Weather Data Reports.** Generate reports to show current or past weather conditions by the hour, day, week, month or year.

**Unlimited Data Storage.** Store unlimited weather data at the central control.

**Multiple Languages.** Choose from 10 different languages (English, French, German, Italian, Japanese, Korean, Portuguese, Spanish, Swedish or Chinese).

**English or Metric Measurement Units.** Easily select between English or Metric units of measure.

The WS-PRO2 Weather Station along with Rain Bird's Smart Weather Software supports alarms when thresholds are exceeded in:

- Rain
- High or low ambient temperatures
- High winds
- Rainfall intensity

When any of these alarms exceed user-defined thresholds in a programmed time period, the system will initiate an alarm condition. The alarms will automatically reset when temperature, rain or wind conditions are again within acceptable ranges for irrigation.

**Automatic Shut Off/Turn On.** Rain Bird Central Control Systems automatically shut OFF irrigation operation for the entire system or in specific areas of the course (tee box, fairway, green, etc.) when alarm conditions are detected at the weather station. They also automatically turn ON irrigation when weather conditions return to the acceptable range for irrigation.

**Automatic Pause/Resume.** Rain Bird Central Control Systems automatically suspend irrigation to the entire system or specific areas (tee box, fairway, greens, etc.) when alarm conditions are detected. They also automatically resume irrigation when weather conditions return to the acceptable range for irrigation.

**Automatic Notification.** The WS-PRO2 Weather Station, using Rain Bird® Messenger™, can automatically notify you wherever you are — at the central control, via text messaging or e-mail — when alarm conditions exist.

HOW TO SPECIFY		
<b>WS - XXXX (XX)</b>	<b>- XX</b>	<b>- X</b>
<b>MODEL</b>	<b>CONNECTION</b>	<b>POWER</b>
PRO2 = Professional Series	SH = Short Haul	Blank = User Supplied
PRO LT = Professional Light Series		S = Solar Powered

WS-PRO LT
