

## Rain Bird Training - Back on the road with classroom teaching

Rain Bird Training helps you to fast-track your irrigation techniques and knowledge so that you can put it into practice immediately.

**Golf Central, IQ Central, SiteControl and Weather Station / ET Training Camp**

**Melbourne: August 31 – September 2 (3 Days)**

**Venue: Cranbourne Botanic Gardens**

**Rain Bird Services - Freecall 1800 225 512**

**Email: [gpservices@rainbird.com.au](mailto:gpservices@rainbird.com.au)**

## Course details:

### Golf Central Control - 1 day

For Superintendents, Assistants, and Technicians. Learn how to navigate through Rain Bird's Golf Central Control software (Cirrus™, Nimbus™ II, Stratus™ II, or Stratus™ LT). Experts will guide you through Front Office icons and show how to make common adjustments to your system. Learn how to write programs using the Quick-IRR feature, how to use the Freedom system to control your irrigation system and how to integrate functions within the Map Office to control your irrigation system. Professionals will teach you how to integrate rain gauge and weather station information to enhance the performance of your system as well as covering print office, utility and diagnostic programs designed to help the user if necessary. Learn how to write and configure programs manually and by using the Simple-IRR feature. Decoder, IC and Satellite system troubleshooting and maintenance will be discussed in detail. Prerequisite: This course requires that the user have a working knowledge of Microsoft Windows operating system.

### SiteControl Course - 1 day

Basic Software Training focuses on the person responsible for the programming, monitoring, and reporting of irrigation operations. This basic class introduces and defines the role of the system hardware components and introduces users to the software and its primary functions related to basic irrigation operation. Emphasis is placed on programming, scheduling, and monitoring the irrigation process. Prerequisite: This course requires that the user have a working knowledge of Microsoft Windows operating system.

### IQ™ Cloud Central Control Course - half day

The IQ™4 Platform offers state-of-the-art monitoring, programming and control features in an easy to learn user interface. This training introduces the IQ™4 Central Control Software system software and its primary functions related to basic irrigation operation, monitoring, programming and reporting. Prerequisite: The participant should have working knowledge of IQ™v3.0 Central Control Software, landscape irrigation system including sprinkler, valve, controller installation and Microsoft Windows operating system.

### Weather Station/ET Training - half day

- Understanding the importance of ET and how it can benefit you and your system.
- Model review (Identifying the differences)
- Maintenance Schedule (When and what to service)
- Review of Maintenance Kits (What's included)
- Field Servicing (Hands on servicing of the stations using Rain Bird Parts Kits)
