

SUBJECT: New 1802PRS and 1803PRS Spray Sprinkler Bodies

NEW MODELS:

Product ID	Model	Product Description
A50505	1802PRS	1802 PRS SPRAY HEAD
A50605	1803PRS	1803 PRS SPRAY HEAD

IMPLEMENTATION DATE: February 3, 2022

Items of Note:

The following notes apply to the new 1802PRS (A50505) and 1803PRS (A50605) spray sprinkler bodies.

1. The 1802PRS and 1803PRS regulate outlet pressure to 30 psi and are designed to work with spray nozzles. They will not physically accommodate rotating variable arc nozzles (RVANs) and corresponding nozzle screens, due to their shorter 2" or 3" stem with pressure regulator (PRS).
2. The 1802PRS includes a factory-installed tapered nozzle screen that fits inside the shorter stem with pressure regulator (PRS). Nozzles are still sold separately. The 1803PRS accommodates all standard nozzle screens, which are available with nozzle purchase.
