

# BAT-BT

COMING SOON in 2024!

With up to five years of unmatched battery life, the BAT-BT controller takes convenience to a whole new level.

Minimize site visits and streamline operations so you can focus on what matters: growing health landscapes. Offline mode allows for total access even when you are not connected to Bluetooth. You can make changes from the comfort of your office and conveniently review them in the field, prior to paring with your BAT-BT device.

## Device Mapping

With low battery alerts, you and your team can plan your route accordingly.

## Device Sharing

Allows your team members to stay up-to-date on newly added controllers, schedule changes, station edits and device locations.

## Monthly Seasonal Adjust

Ensures your watering schedule is automatically changing with the seasons for maximum water conservation.
